## INNOVATIVE & COLLABORATIVE

K&B's Electric – Specialists in Civil & Electrical Works for Substations, OHTL & Underground Cable Projects. Expertise in Power Cable Jointing & Termination up to 132kV with Unmatched Precision and Reliability.

---

# At a Glance – K&B's Electric

---

K&B's Electric stands as a trusted name in the field of civil and electrical engineering services, delivering excellence across critical infrastructure sectors. With proven expertise in Substation (S/S), Overhead Transmission Lines (OHTL), and Underground (U/G) Cable Projects, we provide end-to-end solutions tailored to client needs. Our specialization includes high-voltage power cable jointing and termination services up to 132kV, executed with strict adherence to international quality and safety standards.

Since our inception, K&B's Electric has successfully executed numerous projects, earning a reputation for technical precision, timely delivery, and operational integrity. Our multidisciplinary team of engineers and field experts brings deep domain knowledge and hands-on experience to every project, ensuring sustainable and efficient outcomes.

Headquartered in Al-Khobar KSA, we serve both public and private sector clients, offering scalable solutions for complex infrastructure challenges. Our commitment to safety, innovation, and client satisfaction is reflected in every aspect of our operations. K&B's Electric continues to evolve with the industry, embracing modern technologies and best practices to power the future responsibly.

Bringing ideas & innovation  
to life through technology

# ABOUT K&B'S ELECTRIC

## A BRIEF STORY ABOUT THE COMPANY

K&B's Electric is a fast-growing company formed by a team of skilled, qualified, and experienced professionals. We offer specialized services in Electrical, Civil, and Mechanical Engineering across Saudi Arabia & Pakistan. Our expertise includes substation installation, underground cabling, industrial wiring, and power systems. In civil works, we handle complete building construction, infrastructure development, and waterproofing. We also provide mechanical fabrication, firefighting systems, and HVAC solutions. Additionally, we offer reliable operation, maintenance, automation, and testing services with a focus on quality and safety.

BRINGING IDEAS AND INNOVATION  
TO LIFE THROUGH TECHNOLOGY

---

# VISION

---

Delivering innovative and sustainable engineering services that drive growth and improve communities. Committed to excellence, safety, and integrity in every project we undertake. We strive to power progress by delivering reliable, sustainable, and future-ready infrastructure across Pakistan & KSA.

---

# MISSION

---

- 01 K&B's is dedicated to delivering innovative, high-quality technical services and solutions by investing in cutting-edge technologies and highly skilled personnel, ensuring customer needs in power transmission and distribution are fully met. This commitment enables us to realize our vision through continuous improvement and excellence.
  - 02 Our mission focuses on providing continuous and effective customer support while building long-lasting relationships with clients, addressing challenges in service quality and reliability. By fostering strong communication and teamwork, we overcome operational complexities and deliver consistent results.
  - 03 We prioritize integrity and dedication among employees and suppliers, promoting collaboration and open communication to tackle industry demands and technical challenges. This clear focus on teamwork and ethical values drives us toward achieving our long-term vision successfully.
-

---

# QUALITY STATEMENT

---

## RESPONSIBILITY

At K&B's Electric, our responsibility is to deliver reliable, safe, and innovative engineering solutions that align with our long-term vision. We proactively address critical challenges in power, civil, and mechanical domains through strategic planning and expert execution. By upholding quality, compliance, and customer satisfaction, we ensure sustainable growth and industry leadership.

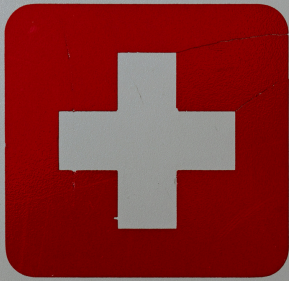

## MULTIFUNCTIONAL

K&B's Electric operates through a powerful integration of primary services in electrical, civil, and mechanical engineering, supported by secondary offerings like automation and maintenance. Our multidisciplinary expertise enables efficient daily operations across complex project scopes. This synergy ensures seamless execution, timely delivery, and consistent quality across all sectors.

## TRANSFORMATIVE

K&B's Electric is committed to transforming infrastructure by addressing core industry challenges with advanced engineering solutions and skilled execution. Our objective is to drive innovation across power, civil, and automation sectors, ensuring client satisfaction and sustainable progress. Through strategic planning and continuous improvement, we align every project with our long-term vision

# SAFETY STATEMENT

We are firmly committed to ensuring a safe and hazard-free working environment for both employees and clients. We achieve this through continuous safety education, effective communication, and strict adherence to safety protocols across all project operations.

## SAFETY FIRST

No task is worth compromising the well-being of our workforce or clients.

## TRAINED WORKFORCE

All employees undergo mandatory safety induction before site access.

## LOSS PREVENTION

Eliminating risks and potential losses is a top management priority.

## QUALIFIED SELECTION

Candidates must meet safety standards or receive thorough training.

# JOINT VENTURE STATEMENT

K&B's Electric is proud to announce a strategic joint venture with Safe Track, a leading provider of safety and security solutions. Safe Track brings specialized expertise in cutting-edge safety technologies, perfectly complementing K&B's Electric's strong foundation in Civil Construction, Electrical Installation & Maintenance, and IT Solutions.

This collaboration unites two industry leaders to deliver innovative, secure, and high-quality engineering solutions across Pakistan and Saudi Arabia — ensuring excellence, reliability, and client satisfaction in every project we undertake together.

---

# SISTER COMPANY: CYBERCRAFTERS

---

Cybercrafters is the official digital solutions arm of K&B's Electric, offering modern, tech-driven services that complement our mission of enabling smarter buildings and businesses. As digital transformation becomes critical across all industries, Cybercrafters extends K&B's value proposition from the physical infrastructure to the digital layer. Operating from offices in Dammam, Lahore, and Karachi, Cybercrafters delivers:

- > Custom Website & Ecommerce Development
- > UI/UX Design and Branding Digital Marketing & SEO
- > Social Media Management & Content Strategy
- > Corporate Identity Design

Cybercrafters is not only a service provider but also an innovation partner. We collaborate with startups, SMEs, and enterprise clients to:

- Develop and scale digital products
- Launch brand identities for new ventures
- Optimize online presence for lead generation

With a shared leadership and vision, Cybercrafters represents K&B's ambition to merge engineering with digital intelligence, empowering clients with both smart infrastructure and smart communication.

---

## CYBERCRAFTERS

CRAFTING DIGITAL DREAMS.

### Collaboration & Strategic Partnerships:

We are actively seeking reselling or distribution opportunities with software providers in areas such as:

- Building Management Systems (BMS)
- Network Security & Firewalls
- Smart IoT Platforms
- Cloud-based Enterprise Tools

If you're looking to expand into the Saudi or Pakistani markets with a local, technically capable, and well-connected partner, Cybercrafters provides a bridge between your solutions and our regional market expertise.

# ELECTRICAL SERVICES

## ELECTRICAL INSTALLATION & MAINTENANCE

K&B's Electric provides expert installation of LV/MV/HV systems, transformers, generators, wiring, substation upgrades, control panels, UPS, lighting, and safety systems with reliable power distribution and automation solutions.

- Installation of LV/MV/HV Panels
- LV & Control Cable laying and termination at EHV/HV Substation
- Modification of Protection Scheme in Live Substations
- Power / Distribution Transformer Installation
- Cable Tray & Ladder Installation
- Laying of Unground LV/MV/HV Cables.
- Diesel / Gas Generator Set Installation
- Generator Limited Auto Power Supply System for Apartments
- Industrial and Commercial Building Electrical Wiring
- UPS System Installation
- Data Networks Setup
- Fire Detection & CCTV System Installation
- Industrial & Street Lighting Pole Setup
- Motor Control Panel Design & Installation
- Power Factor Improvement Plant
- Auto Changeover Panel
- Generator AMF & ATS Panel
- Power & Lighting Distribution Boards (DB)

RELIABILITY

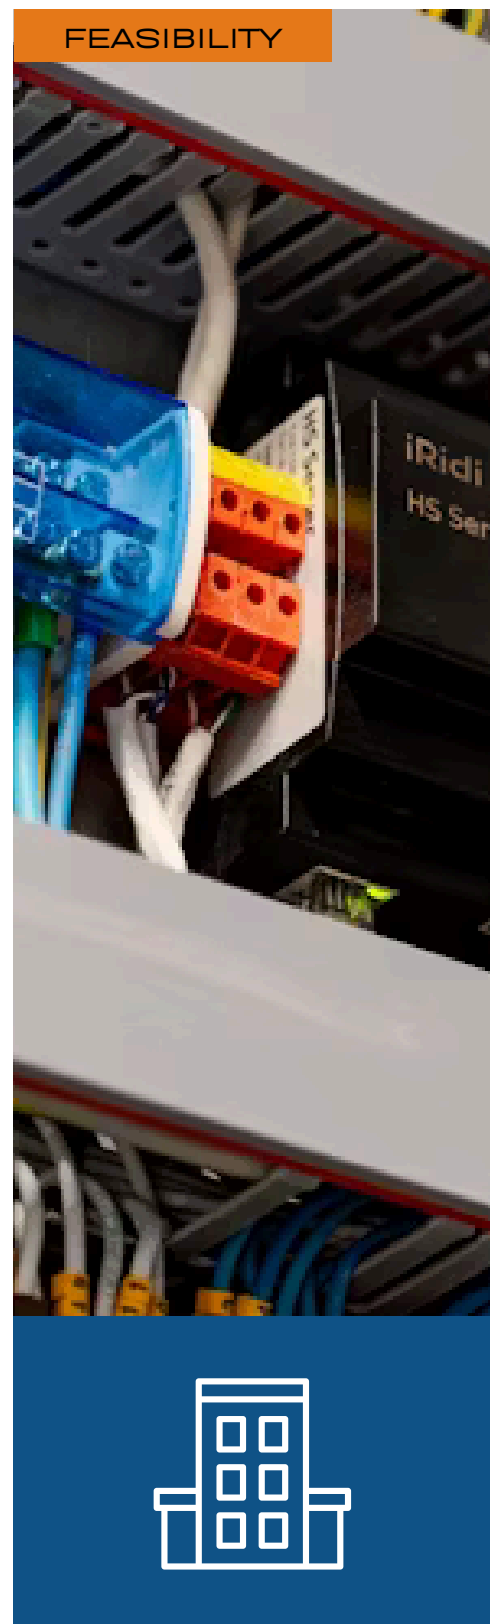

# BUILDING MANAGEMENT SYSTEMS

At K&B's Electric, we specialize in cutting-edge Building Management Systems (BMS) that optimize the efficiency, safety, and comfort of commercial and residential properties. Our expert solutions integrate HVAC, lighting, security, and energy management into a centralized, intelligent platform.

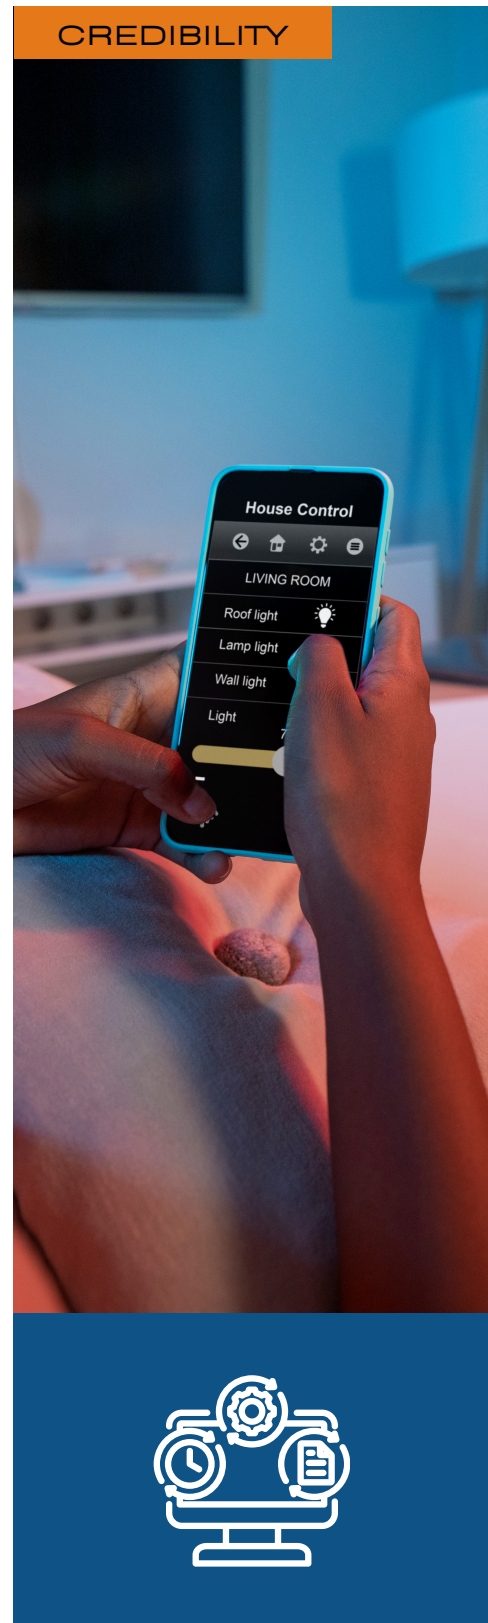

- Comprehensive BMS Design & Installation
- Tailored systems to automate and control your building's critical infrastructure with precision and reliability.
- Energy Efficiency & Sustainability
- Implement smart energy-saving strategies to reduce operating costs and your environmental footprint.
- Security & Access Control
- Integrated video surveillance, alarms, and access management to safeguard your premises 24/7.
- Remote Monitoring & Control
- Manage and monitor your building's systems remotely via mobile and web apps for real-time insights and control.
- Customized Maintenance & Support
- Proactive maintenance and responsive support to ensure continuous optimal performance.

# SMART AUTOMATION SERVICES

At K&B's Electric, we transform conventional spaces into intelligent environments through our cutting-edge Smart Automation Services. Our solutions are tailored for residential, commercial, and institutional settings, enabling enhanced comfort, energy efficiency, and control — all from a centralized system.

- Smart Building Automation
- Centralized control of lighting, HVAC, and electrical systems with energy optimization and remote access.
- IT & Network Infrastructure
- Structured cabling, LAN/WAN, Wi-Fi setup, and automated network management for connected environments.
- Home & Office Automation
- App and voice-controlled smart switches, motion sensors, and device scheduling for comfort and energy savings.
- Security & Access Control
- CCTV, video intercoms, RFID/biometric entry, and real-time mobile surveillance for safety and control.

# CIVIL SERVICES

## CIVIL CONSTRUCTION

K&B's Electric specializes in building construction, water structures, access roads, cable trenching, boundary walls, industrial flooring, precast RCC fabrication, and complete earthworks including milling, asphaltting, and backfilling.

**Our team offers complete civil engineering services for various construction needs, including residential, commercial, and industrial sectors:**

- Construction of Residential, Commercial, and Industrial Buildings
- Construction of Water Retaining Structures, Reservoirs, & Aqueducts
- Road, Pavement, Open Car Park, Kerb Stone & Footways Construction/ Construction of Access Road
- Excavation and backfilling of MV/HV UG Cable trenches
- Construction of Boundary Walls & Heavy Industrial Foundations
- Monolith Flooring & Industrial Hard Standing Floors
- Precast RCC Structure, Road Barrier Design & Fabrication
- Earth, Milling & Asphaltting Works

DURABILITY

# MECHANICAL SERVICES

## MECHANICAL INSTALLATION

K&B's Electric offers reliable mechanical services including pipe and structural fabrication, welding, erection, and insulation. We also specialize in firefighting system installations, complete ventilation and ducting solutions, and secure fencing setups for industrial and commercial facilities.

**We offer end-to-end mechanical engineering services, including fabrication, installation, and maintenance:**

- Pipe Fabrication, Welding, Erection, and Insulation
- Structural Fabrication, Welding, Erection
- Firefighting System Installation & Piping Network
- Air Ventilation & Ducting System Installation
- Installation of fencing

TRUSTWORTHINESS

# TECHNOLOGY SERVICES

## COMMUNICATION AND AUTOMATION/IT SOLUTION

K&B's Electric provides cutting-edge technology services including Fiber Optic Cable (FOC) laying & splicing, CCTV and security system installations, and precision calibration & commissioning. We design and implement LAN, WAN, and wireless networks, delivering smart automation and IT solutions tailored to your operational needs.

**We specialize in advanced communication and automation solutions to enhance system integration and performance:**

- Fiber Optic Cable (FOC) Laying & Splicing
- Security Systems Setup
- Calibration & Commissioning Services
- Installation of Network
- Installation of CCTV System
- Designing and implementing local area networks (LAN), wide area networks (WAN), and home office network setups.
- Wireless network setup, configuration, and security services.
- We offer cutting-edge IT solutions for all your automation and network needs.

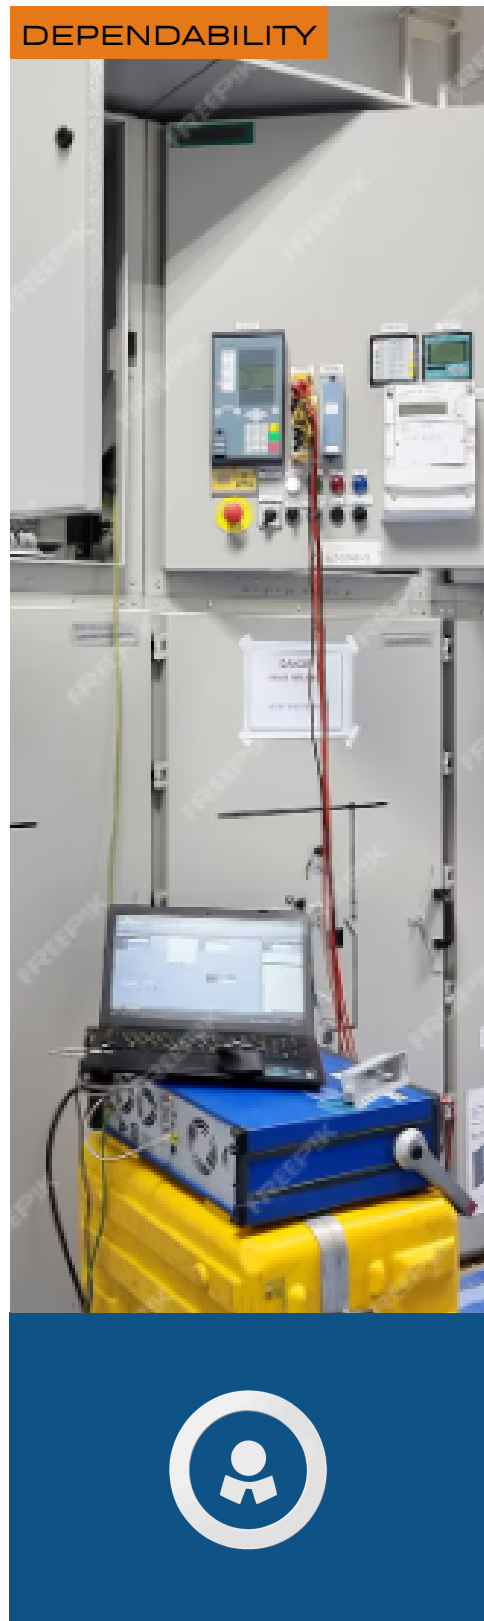

# TESTING & COMMISSIONING SERVICES

K&B's Electric offers comprehensive testing and commissioning services to ensure system reliability, safety, and compliance with industry standards. Our scope includes pre-checks, relay and control panel testing, CT/VT equipment and injection tests, breaker timing, protection scheme verification, TTR, and winding resistance analysis.

**We provide testing and commissioning for various electrical and mechanical systems to ensure efficiency and compliance:**

- Pre-Check Activities
- Wiring check of relay and Control Panels
- Auxiliary and trip relay testing
- Main relay testing
- CT & VT Equipment test
- CT & VT Secondary injection test
- Breaker Timing Test
- Protection Scheme Test
- TTR
- Winding resistance test

# WORKFORCE SERVICES

## SUPPLY OF SKILLED MANPOWER & EXPERTISE

K&B's Electric provides a qualified workforce skilled in EHV-LV systems, FOC splicing, transformer and GIS installation, cable termination, and system troubleshooting to ensure efficient, reliable project execution.

### Expert Technicians for Electrical and Power Systems:

- Experienced technicians for installation, commissioning, and maintenance of EHV, HV, MV, and LV panels.
- Expertise in LV & Control Cable Laying and Termination for various voltage systems.
- Skilled in FOC Laying and Splicing for fiber optic cables.
- Competence in Modification of Schemes to meet project requirements and specifications.
- Installation and commissioning of Distribution and Power Transformers, ensuring reliability and efficiency.
- Expertise in Installation of GIS (Gas-Insulated Switchgear).
- Assistance to testing engineers for system integration and troubleshooting
